

Audit Inspection & Reporting System

Lifecycle support for scheduling, conducting, and reporting on audits, inspections, and financial reviews.

The Audit Inspection & Reporting System supports federal auditors and investigators who oversee legal, administrative, and procedural compliance. The system supports audits of agency personnel and programs, or industry partners subject to monitoring.

ACQUIRE AUDIT INFORMATION

Manage data calls and corrective action plans via secure portal throughout the audit lifecycle.

OUTCOME DRIVEN SYSTEM

Provide management of a configurable, mobile-ready, workflow process from initiation through resolution.

VISABILITY & REPORTING

Real-time data analytics enhancing resource allocation, organizational efficiency, and report generation.

- The system allows for both internal and external users to submit, collect, and analyze evidence throughout the audit process.
- Files of any type can be uploaded to a central repository in order to be utilized in and linked to final reports.
- Monitor the status of an audit with the ability to collaborate, evaluate, and report on progress from intuitive dashboards.
- Aggregate information based on location or regions to identify trends. Analysis can be completed based on audit type, agency, or sector partner.

A comprehensive audit system that synthesizes targeted data to evaluate the efficiency, effectiveness, and compliance of agency programs and operations.
