Microsoft

Transparency

ENHANCE COLLABORATION WITH A CENTRALIZED REPOSITORY

Centralize storage of case-related correspondence, emails, notes, assessments, and contacts. Protect data at the field level, ensuring that users see only the information they are authorized to see. Surface case data through intuitive discovery capabilities.

PROVIDE INTEGRATED TASK MANAGEMENT

Automate work assignments, approvals, notifications, alerts, document management, and reporting. Use workload analytics and powerful search capabilities to optimize task assignments and remove bottlenecks throughout the case workflow.

CONFIGURE BUSINESS LOGIC AND RAPIDLY DEPLOY NEW USE CASES

Empower business users to create and manage business rules. Integrate seamlessly with your existing IT assets and scale for enterprise-class performance. Enable sophisticated, powerful rules that model business workflow, policies, and procedures.

PROVIDE EFFECTIVE CASE ANALYTICS AND REPORTING

Enable transparency and visibility through comprehensive dashboards of workload metrics, trends, and status. Link case actions and actors to build powerful correlation analysis that deliver new insights and drive business decisions.
