Cloud Ready — Office 365

USE THE SHAREPOINT BASED VIRTUAL OFFICE TO SUPPORT YOUR MOBILE WORKFORCE

Connect your mobile workforce community when they are working remotely. Reduce the need for physical real estate by providing convenient tools to reserve, share, and manage space and resources when a physical presence is required. Achieve all this by leveraging your SharePoint investment.

DRIVE EFFICIENCY

SITUATIONAL AWARENESS — Enable successful decision-making in the workforce by providing users with organizational context. Provide a single location for users to collaborate, work, and share information.

COMMUNICATION — Provide an online place for teams to interact, build team rosters, and gain instant access to colleagues. Instantly know where people are physically located at any given time.

ACTIVITY COORDINATION — Maximize the features of SharePoint to streamline work activities using familiar and intuitive tools.

SOCIAL CONNECTIVITY — Use microblogging and team-focused tools to build a sense of community.

MOBILITY — Equip workers with the tools they need to effectively work together regardless of geographic location.

INFORMATION TRANSPARENCY — Provide easy access to information to help people work more effectively and efficiently.

REDUCE COST

SHARED HOTELING SPACE — Minimize the need to permanently allocate office space. Enable self-service reservations, allowing users to browse and search for physical space with an intuitive graphical interface.

MEASURE AND OPTIMIZE — Gain a clear picture of how your physical office space and resources are being utilized. Analyze your resource needs with reports and dashboards in an effort to achieve ongoing space management objectives.

PROVEN TECHNOLOGY — Microsoft SharePoint is an industry-leading collaboration platform. The Virtual Office solution seamlessly extends SharePoint to augment and optimize your virtual workforce strategy. Eliminate the need to purchase proprietary and often expensive software products.

CLOUD READY — Run the solution either on-premises or in the cloud, enabling you to realize the cost reduction benefits of cloud providers when your organization is ready.
