Digital Subpoena Solution

A powerful investigative tool tailored for high volume federal investigators.

procentrix

The Digital Subpoena Solution transforms administrative subpoena execution. It generates faster approvals, eliminates redundant actions, digitizes service process to telco carriers and other entities, obtaining results measured in hours instead of weeks. Discover why operators say "the [solution] has been a game changer in the field."

UNPRECEDENTED SPEED

Automate retrieval of subpoenaed data directly from telcos with no hard copy transmission, expediting servicing and fulfillment with major carriers. 20% uptick in process utilization in under 12 months.

SECURE & DEFENSIBLE

Securely obtain electronic approvals designed to comply with judicial review; digitally signed subpoenas with hashed copies archived to guarantee document authenticity.
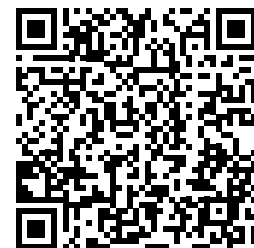

REAL DIGITAL IMPACT

Achieve a zero paper reality in administrative subpoena generation, approval, and servicing through cloud automation and real-time integration with external parties.

- User-aware subpoena creation templates accelerate data entry.
- Bulk import of IPs and phone numbers dramatically speeds high volume subpoena creation.
- Modern cloud architecture ensures maximum stability and uptime with minimal maintenance.
- Real-time vendor lookups ensure subpoenas are served to the right vendor, the first time.
- System portability enables approvals through a mobile application.
- Real-time analytics on usage and results.

> *When you go home at the end of the day, I want you to ask yourself what you did to help improve the job for the agents in the field. The [solution] is a tool that hits that mark.*
