Translation & Transcription Tool

Accelerate your investigations with the high volume translation and analytic power of AI.

procentrix

The Translation and Transcription tool can immediately reduce the time and overhead for cases that require translation or transcription, as proven by one of the United States' largest federal criminal investigative agencies.

AUTOMATED TRANSLATION AND TRANSCRIPTION

Import and analyze digital audio, video and document files, of any size, in 100+ languages, in near-real-time.

FIND THE DATA THAT MATTERS MOST

Identify and rank relevant case data based on custom case dictionaries.

FLAG: "PEOPLE, PLACES, THINGS"

Create tags for prioritized data relevant to the case, linking cross-referenced case data.

- Find the needle in the haystack. The relevance score feature empowers users to concentrate on the most significant case details.

- Connect data across case files via our intelligent linking system. Bridge investigative gaps by identifying related subject information.

- Leverage AI for greater efficiency, enabling significant time and cost savings without compromising output.

[The Procentrix T&T Tool] is providing more languages than any other tool that [we] have available, currently. [The T&T Tool] also allows us to upload large data-sets for translation for pennies on the dollar.

– Investigative Chief

Reduce average media-file analysis from 80 hours to 8 minutes.
